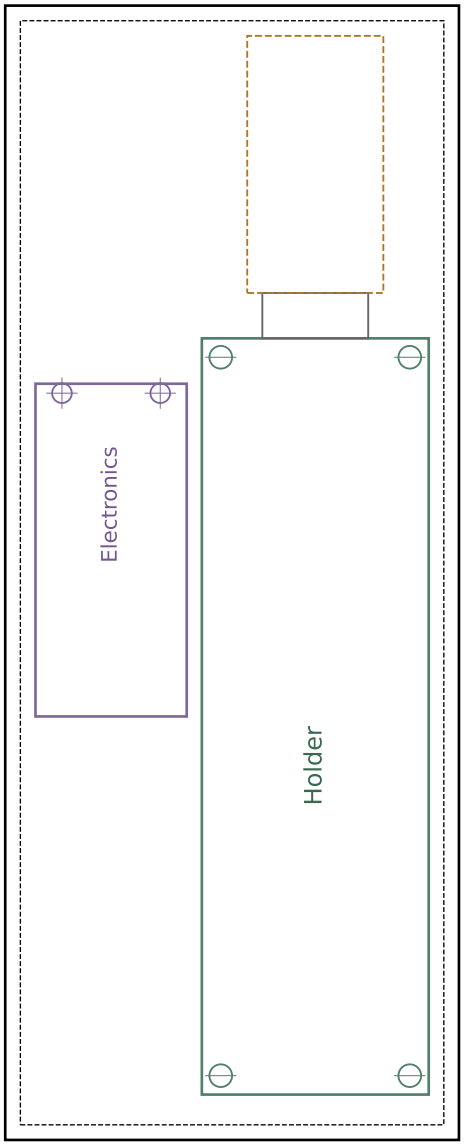
ALIVE enclosure, paper fit check

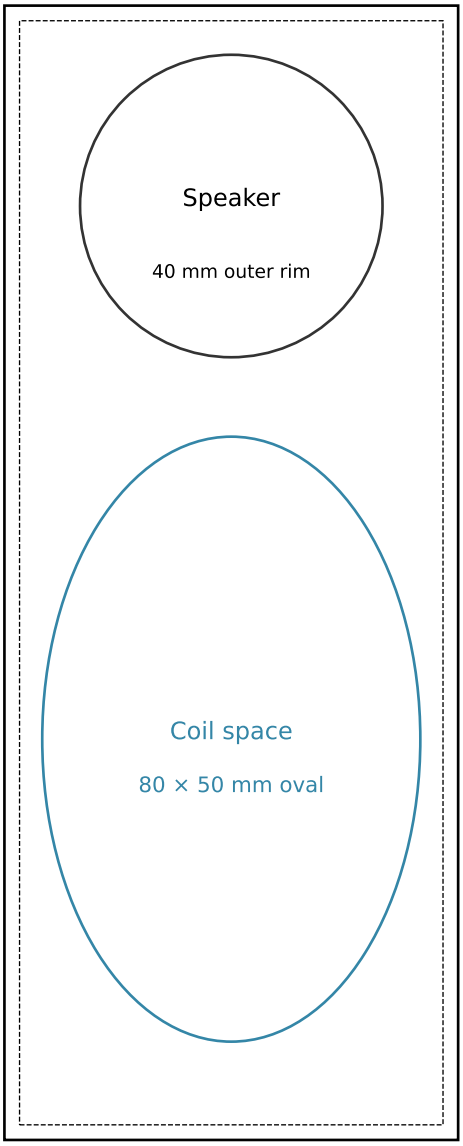
Print at 100%. Disable fit-to-page scaling. Measure the 100 mm bar first.

Rear layer



60 mm outside width

Front layer



60 mm outside width

This bar must measure exactly 100 mm.

Holder hole centres are 25 mm apart across the board and 95 mm along its length.

Amplifier holes are 13 mm apart, centred across the board and 1.25 mm from its upper end.

The two layers occupy different depths. This sheet checks their footprints only.

Electronics measure 25 mm high. The reserve is 28 mm, with 10 mm behind the brown board.

Check hole alignment, notch areas, 2 mm spacers, cable fit, lid and printed tolerances.
